DETAILED ACTION

Specification -

Applicant is reminded of the proper language and format for an abstract of the disclosure. The form and legal phraseology often used in patent claims, such as "means", in line 4, should be avoided.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Finkelstein et al 5,520,237.

Finkelstein et al set forth a hanger comprising an elongated backing plate portion 25; a plurality of spaced studs 27 along the length of the backing plate; a retaining plate 26 for locking with the studs; each stud be cylindrically shaped and having a plurality of locking means comprising grooves having sidewalls perpendicular to the axis of the studs; the retaining plate having apertures 28 corresponding to the studs of the backing plate; a stiff elastic retaining disk (viewed as a surrounding portion of members 22) sliding over the studs; and backing plate mounting means (viewed as inclusive of its side edges).
